

## Meet our Facilitators

This month we would like to introduce you to our faculty Anuradha Singh who holds a PhD in the field of 'Epigenetics' from the University of Leeds, UK. She was awarded the prestigious 'Marie Curie Fellowship' to do her research. She has published a research article in the field of Epigenetics in a top peer-reviewed journal. She has also contributed a chapter on 'Current Practices in Organic Waste Recycling and Composting in Rural and Urban Areas of India' to a research study conducted by ACIAR, an Australian Government statutory authority. Anuradha has over 10 years of research experience and has worked in prestigious organisations, like IISc, BARC, NCBS in India and IRD in France. She is also a recipient of a gold medal for her M.Sc from Mysore University.

Although she loves research, her secret passion was always to teach. And she feels her vast experience from rural and urban India, UK, France, Spain and Greece as a scientist will enable her to teach students to apply knowledge to real life. In her free time, she is interested in watching world documentaries, gardening, reading and cooking. At Chaman Bhartiya she is a facilitator for grade 3.
