

# What's happening at School?

## **Chaman Bhartiya Initiates Inspirational Activities for your child:**

While the school contributes towards acquiring knowledge/skills, family plays an important role in shaping a person's character through values, tradition, culture and environment. Taking cognizance of the current situation owing to COVID-19, we have enclosed along with this newsletter, some inspiring ideas/activities which you can carry out with your child.

We are equally concerned about the academic gap as well as the psychological well-being of your child.

Bringing activities which involve the family, we aim to introduce the concept of personalized learning as per the ethos of the school. In this context, personalized learning refers to how each parent interprets and implements each activity - for instance - asking grandparents to share a traditional recipe and asking parents to cook the same. This activity will automatically be interpreted by the family depending on which part of India they are from, their culture and traditions. Accordingly, each parent will share their information with the child depending on his age and how he assimilates information.

We have also stated a few explicit outcomes to each activity such as increase in family bonding, observation skills, reflection to name a few. These activities will be shared on a weekly basis. Please do not forget to share your feedback with us at: [parent@chamanbhartiya.com](mailto:parent@chamanbhartiya.com)
