

# Meet our Facilitators

Introducing our grade 5 facilitator and school coordinator, Sheeba John. Sheeba has a decade and a half years of experience as an educator, facilitating English, Maths and Science in the primary years and high school of which over 13 years are with an international school in the primary years.

Being a mainstay in the education field, she has been the Maths department head for the primary years, overseeing the teaching and learning of Maths with the same international school. She has formulated several Maths policies for the school and introduced the concept of Maths Mastery in the primary years. This encompasses the building of fluency, reasoning, conjecturing and problem-solving amongst the children so that they can be effective problem-solvers in any context they find themselves in.

Sheeba is as accomplished as it gets. She did her Bachelors in Computer Science, English and Statistics. She also completed her Bachelors in Education attaining the 9th rank in the university. Her favourite quote is "Ajeeavanam Gyanavardhanam" which means life is for learning and learning is for life. Being a firm believer in this saying, she has added a few post-graduate certificates in the field of Education to her repertoire over the last few years. These include PGDEA (post graduate diploma in educational administration) from Symbiosis Pune, CIDTL (Cambridge International Diploma in Teaching and Learning), CIDEL (Cambridge international Diploma in Educational Leadership), PGCEi ( Post-graduate certificate from Nottingham University). She is planning to pursue her Master's in education now as she believes that to be an effective facilitator, she needs to be a learner first.

Apart from all the above, Sheeba is a vivid reader which helps her keep abreast with the 21st-century skills and dispositions so that she can reach the 21st-century learners effectively.
